

Steel Tape Measuring, Inc.

Steel Tape Measuring, Inc. provides clients with square footage measurements and floor plans of existing houses, based upon the North Carolina Real Estate Commission standards for measuring residential square footage. We have been in business since 2000 and currently work in the Greater Charlotte, NC area.

The detailed floor plans we provide include windows, doors, counters, bathroom fixtures and room dimensions. These plans are meant to be used only for marketing a house and not for general construction. Square footage measurements are taken from the existing house using interior and exterior measurements to accurately give a heated versus unheated calculation.

We are seeking someone(s) to work a general market in the North Carolina and South Carolina areas assisting with residential house measuring. Each market would be a start-up area and Corporate will help finding and targeting potential clients.

This job requires you to visit each house and measure accurately, providing sketches to our drafting department for creation of floor plans. Training will be provided to teach you the methods of measuring a house and sketch all interior rooms and exterior of the house.

Job requirements:

- General knowledge of residential building methods, preferred.
- An appraisal license, Contractors license or Real Estate Broker, preferred but not necessary.
- Must have your own dependable transportation.
- Ability to communicate and schedule your own appointments with clients.
- Knowledge of North Carolina Real Estate Commission guidelines for measuring residential property would be recommended.

Salary is commission only, based per house measurement.

Send resumes to info@steeltapemeasuring.com and someone will review and be in touch with you.

Possible work zones: Asheville, Winston-Salem, Greensboro / High Point, Wilmington, Raleigh, Carolina Beaches, and Durham/ Chapel Hill area.
